PAVAN KUMAR GURIJALA

SENIOR AZURE/INFRASTRUCTURE ENGINEER

Hyderabad, India | Mobile: 7780646924 | Email: pavan@pavan-cloud.in

PROFESSIONAL SUMMARY

Microsoft-certified Azure Infrastructure and Windows Engineering professional with 20+ years of enterprise IT experience and strong production-operations background across banking and global enterprise environments. Hands-on experience supporting business-critical Microsoft Azure workloads, Azure Virtual Machines, VNets, storage accounts, subscriptions, resource groups, RBAC, Azure migrations, Terraform-based provisioning, Azure DevOps CI/CD, PowerShell automation, monitoring, incident response, performance troubleshooting, change/release execution, and root-cause analysis. Experienced in high-availability production support, zero/minimal-downtime execution, observability using Grafana, Splunk, OpsRamp and related monitoring platforms, and cross-functional coordination with development, application, security and infrastructure teams.

AZURE / SRE CORE SKILLS

Azure Compute & Infrastructure: Azure Virtual Machines, VM sizing/resizing, OS configuration, VM images, subscriptions, Resource Groups, Azure Storage Accounts, Azure Migrate, Azure infrastructure administration

Azure Networking: VNets, VNet peering, regional connectivity, DNS/DHCP, network troubleshooting, Azure RBAC and resource-level access

Infrastructure as Code: Terraform; Azure infrastructure provisioning and standardization; Ansible exposure

Automation & Scripting: PowerShell automation, server provisioning, patch deployment validation, compliance checks, service monitoring, remediation and operational task automation

CI/CD & DevOps: Azure DevOps, Azure Repos/Git, Azure Pipelines, deployment infrastructure support, build/release pipeline change requests, pre-production deployment and monitoring

Observability & Monitoring: Grafana, Splunk, OpsRamp, ExtraHop, SolarWinds, ENOW, SCOM, Lansweeper; CPU/memory/disk/network monitoring; daily health checks; Kusto Query Language (KQL) exposure

Reliability & Production Operations: High availability, production incident management, Sev2/Sev3 support, RCA, problem management, SLA/SLA-breach tracking, change management, CAB, zero/minimal downtime execution

Security & Governance: Azure RBAC, vulnerability management, Tenable, patch compliance, remediation coordination, security auditing, SOPs, ServiceNow, ITIL processes

Microsoft Platforms: Windows Server, Active Directory, Group Policy, VMware, SCCM/MECM, BigFix/Tanium, SQL support, Microsoft 365

CERTIFICATIONS

- Microsoft Certified: Azure Administrator Associate (AZ-104) – 2021
- Microsoft Certified: Azure Solutions Architect Expert (AZ-305) – 2022
- Microsoft Certified: Windows Server Hybrid Core Infrastructure (AZ-800) – 2024
- MCSE – 2006 | ITIL v3 Foundation – 2012

PROFESSIONAL EXPERIENCE

Synechron | Lead Specialist – IT Operations / Specialist – IT Operations | *Mizuho Bank* | *Jul 2023 – Sep 2026*

- Administered and supported Microsoft Azure infrastructure and Windows production environments with focus on availability, security, performance and operational continuity.
- Provisioned and configured Azure Virtual Machines, managed VM images, performed OS/application troubleshooting, and provided Tier-2/Tier-3 production support.
- Led on-premises workload migrations to Azure using Azure Migrate and related migration tooling; executed changes with zero/minimal production impact.
- Used Terraform for cloud infrastructure provisioning and configuration standardization; supported Infrastructure-as-Code initiatives.
- Developed PowerShell automation for server provisioning, patch deployment validation, compliance audits, service monitoring and remediation, reducing repetitive manual effort.
- Collaborated with DevOps teams to integrate Azure Compute with CI/CD pipelines and supported deployment-related operational activities.
- Monitored CPU, memory, disk and network utilization using OpsRamp, Grafana and Splunk; performed daily health checks and operational validation.
- Investigated critical infrastructure issues, coordinated remediation with application/DevOps teams, and led root-cause analysis and process improvements.
- Prepared SOPs and operational documentation in Confluence; communicated downtime, project updates, remediation timelines and troubleshooting progress.
- Managed end-to-end patching, vulnerability remediation and compliance reporting for Windows infrastructure, coordinating security patch testing and production deployment.

Cloud4C (CtrlS Company) | Principal Engineer / Tech Lead – Manager | *Global Cloud Operations* | *Oct 2022 – Jun 2023*

- Managed cloud operations and a team of 18+ resources supporting multiple customer environments, including on-call operations, SLA tracking, incident/problem queues and governance.
- Managed Azure infrastructure and built Azure environments using Terraform/Ansible; supported standardized cloud deployment practices.

- Performed Windows and Azure infrastructure administration, troubleshooting, hardening and operational maintenance.
- Led critical-issue resolution, RCA, customer governance and service delivery activities; tracked SLA breaches and problem tickets.
- Conducted knowledge-transfer sessions and maintained SOP/SOW documentation for operational readiness.

Mindtree | Technical Specialist / Shift Lead | *Microsoft – Azure Data Center Support* | *Feb 2022 – Oct 2022*

- Supported Microsoft Azure deployment infrastructure handling live-site incidents, service requests and production/pre-production deployment activities.
- Performed build-out and smoke testing, monitored deployment infrastructure and troubleshot Azure services using Microsoft operational tools.
- Handled Sev2/Sev3 incidents through Microsoft incident-management processes and troubleshot Azure VM boot issues.
- Supported Azure build/release pipeline changes through controlled change requests and coordinated daily activities with development teams.
- Used Kusto Query Language (KQL) and Power BI for operational reporting, incident analysis and management reporting.
- Supported transition of on-premises workloads to Azure and documented architecture, configuration and setup.

IBM | Subject Matter Expert – Windows | *State Street Bank / IOL* | *Oct 2019 – Feb 2022*

- Supported 20,000+ Windows servers and Azure infrastructure in a large enterprise banking environment.
- Configured Azure VNets and regional peering; managed subscriptions, VNets, Resource Groups and Azure Storage Accounts.
- Implemented Azure RBAC at subscription, Resource Group and resource scope; migrated resources across subscriptions/resource groups.
- Built Azure Virtual Machines using Terraform and supported migration of on-premises workloads to Azure.
- Supported migration of Microsoft SQL databases to Azure PaaS services.
- Performed production infrastructure troubleshooting, performance analysis, RCA, change execution and automation using PowerShell.
- Coordinated enterprise patching, security remediation and change activities across development, UAT, production and DR environments.

JP Morgan | Associate | *Enterprise Windows Infrastructure* | *Jun 2017 – Oct 2019*

- Planned, implemented and maintained Windows/VMware infrastructure and supported enterprise production operations.
- Managed Azure subscriptions, VNets, Resource Groups, Storage Accounts and Azure AD; implemented RBAC and migrated on-premises VMs to Azure.
- Created and modified PowerShell scripts for operational automation and troubleshooting.
- Handled application, OS, network and storage performance issues; performed RCA and resolution within SLA.
- Supported high-availability VMware environments and large-scale Windows patching across enterprise server estates.

EARLIER EXPERIENCE

IBM – Technical Services Specialist (Aug 2015 – Jun 2017): Windows/VMware infrastructure, Azure migration, BigFix/WSUS patching, CAB/change management, RCA and operational documentation.

ValueLabs – Technical Service Specialist – AD/Messaging (Dec 2010 – Aug 2015): Windows/AD/Exchange infrastructure, security patching, DR, VMware, monitoring, backup and infrastructure improvement.

Magna Infotech – System Administrator (Oct 2005 – Dec 2010): Windows, SQL, DNS/DHCP, Exchange, monitoring, disaster recovery, virtualization and infrastructure support.

EDUCATION

M.Sc. – Information Technology, Nagarjuna University
