JOB SPECIFICATIONS	
Qualification:	B.Tech / B.E / Graduation in any specialization
Years of experience:	8+ years of Experience in · Solid understanding and experience with operating system concepts and practical implementation of those fundamentals in a large-scale production environment. · Good at **Tanium Patching tool** modules like Patch and Deployment · Coordinate patching activities (**Tanium tool)** with stakeholders, ensuring adherence to maintenance windows and change management processes. · Implement best practices for patching to minimize downtime and reduce risk exposure. · Manage patch lifecycles using **SCCM**, including creating, testing, and deploying patches. · Configure and maintain **SCCM** infrastructure for software updates and compliance. · Monitor patch deployment status and compliance reports to ensure security standards are met. · Good at **Microsoft Defender for Endpoint (MDE),** including configuration, deployment, and policy management. · **Threat detection and response** using Defender's advanced hunting and incident investigation capabilities. · Monitoring and tuning alerts to reduce false positives and improve detection accuracy. · Experience with vulnerability management and remediation through Microsoft Defender's threat analytics. · Strong knowledge of EDR (Endpoint Detection & Response) and automated investigation workflows

	· Working knowledge and experience with key ITIL processes is required. oPrevious application development coding, debugging, testing and delivery into a production environment are highly desirable. · A solid understanding of performance metrics and tools is highly desirable, to include understanding of CPU utilization levels, CPU and disk queuing, I/O response times, and other key performance indicators and their impact on performance. · Network fundamentals and performance principles, including a firm understanding of TCP/IP protocols. · Working knowledge of GPO creation and management

Skills and Capabilities	Details
People Management Skills	N/A
Technical Skills	· **Advanced Troubleshooting Skills (Operations Systems - Windows)** · Ability to effectively communicate and present ideas to various engineer levels and end users · Maintain frequent interaction with internal and vendor technical staffs and project managers to ensure effective delivery of solutions in accordance with project timelines and associated budgets.

Skills and Capabilities	Details
	· Provide technical guidance for the installation and certification of all supporting software and hardware in a lab environment to assure a sound deployment basis for production implementations. · General knowledge of cybersecurity and ways to protect an enterprise from such attacks. · Understanding of Business continuity solutions and effective implementation whenever it is required. · Identifies and documents IT&S data protection processes and procedures; develop and apply efficiency solutions to existing processes. · Participation in afterhours support - on-call rotation · Capable of working effectively under a high pressure and demanding work environment. · Capable of working effectively in a diverse, virtual team-oriented environment. · Must be a self-starter and work effectively with minimal supervision. · Must be customer-oriented and recognize the importance of customer service and meeting service level commitments. · Must be committed to the quality and timeliness of assigned deliverables and milestones.
Other Skills	· Must possess leadership skills and be able to lead others through influence. · Capable of working effectively within a high pressure and demanding work environment.

Skills and Capabilities	Details
	· Must be self-motivated and work effectively with limited supervision. · Must be customer-oriented and recognize the importance of customer service. · Good process assessment, analytical, and planning skills and be able to multi-task proficiently and exhibit good decision-making skills. · Ability to identify problems and note trends. · Excellent verbal and written communication skills. · Excellent organizational skills. · Effective negotiation and conflict management skills · Exhibits teamwork skills and abilities
Tools	· Service Now, SCCM & Tanium - Preferred
Certifications (Good to have)	· MCSE, MCSA, MS Defender (Security) - Certification
